

CONTRACTOR'S CHOICE®

PRICING AND SPECIFICATIONS

Effective February 2016. Supersedes all prior versions.

NEW PRODUCTS

- ▶ **New Base Cabinet with Tray Divider (B09TD), see page 20**
- ▶ **New SKU nomenclature for Square Corner Easy Reach Cabinet (SCER36); now feature a knuckle hinge, see page 24**
- ▶ **New SKU nomenclature for Oven Cabinet (OCSD33, OCSD3390, OCSD3396), see pages 27-28**
- ▶ **Trim Moulding (MTW8, PSMTW8), see page 41**
- ▶ **Wrapped Mouldings (PSMSW8, PSMCROWN8, PSMFOLCR8, PSMTCROWN8, PSMQR8), see pages 41-42**
- ▶ **Frame Spacers (HNGSPCRF, HNGSPCRF50), Hinge Spacers (HNGSPCRD, HNGSPCRD50), Restrictor Clips (HNGRESCLP), see page 50**

DISCONTINUATIONS – Last Order Date 1/29/2016

- ▶ **Square Corner Easy Reach Cabinet, SCER36PH, replaced with SCER36**
- ▶ **Oven Cabinet (OC33, OC3390, OC3396), replaced with OCSD33, OCSD3390, OCSD3396**

Characteristics of Wood

No matter which wood type you choose for your new kitchen or bath cabinetry, please keep in mind that no two pieces of wood are exactly the same. Stains are likely to exaggerate the difference between open and closed grains and other markings in wood. Grain variation and color change should be expected. As hardwood ages, it will darken when exposed to different types of light. Color differences or changes in wood can also be caused by exposure to harsh chemicals, extreme heat, or other contributing external conditions. Additionally, wood species exhibit other defining characteristics, such as mineral deposits/streaks, knots, sap runs, pin holes, and wormholes. These markings make the wood unique and contribute to its enduring beauty.

Oak

- ▶ Very strong wood with distinct grain patterns
- ▶ Grain variations create a color gradation when stain is applied
- ▶ Grain patterns include fine lines, pin stripes, leafy grains, and watery figures

Birch

- ▶ Even-textured, fine-grained wood with a curly or wavy pattern
- ▶ Strong with a high resistance to abrasion
- ▶ Smooth, dense surface texture
- ▶ Tight wood grain appearance

Characteristics of Laminates

Thermofoil

- ▶ Doors & drawer fronts are shaped MDF core covered with a seamless vinyl laminate on face & edges, and a melamine laminate on back
- ▶ Vinyl laminate is applied to MDF with an adhesive using heat & pressure
- ▶ Creates a product with excellent wear and heat resistance properties

Humidification

Cabinet components are typically manufactured at a target range of 40%–50% relative humidity. This works well because even unhumidified homes stay between 20% and 70% in normal years with typical cooking and washing activities.

In extremely cold, dry winters some doors can be exposed to conditions where relative humidity is below 20% for weeks at a time, causing shrinkage to occur. Conversely, where in-home relative humidity exceeds 70% for extended periods of time, expansion could occur. In certain geographic locations of the country, it is natural for the humidity to reach and remain at 80% for several weeks during the new construction period. Exposure to sustained conditions such as these could cause opening of the joints, and will not be considered as a reason for product replacement.

Contractor's Choice recommends product be stored and installed in an atmosphere where the humidity level and temperature are controlled.

Humidification Effects on a Door with a Miter Joint

High Humidity

When wood swells, miter joints open as shown above.

Low Humidity

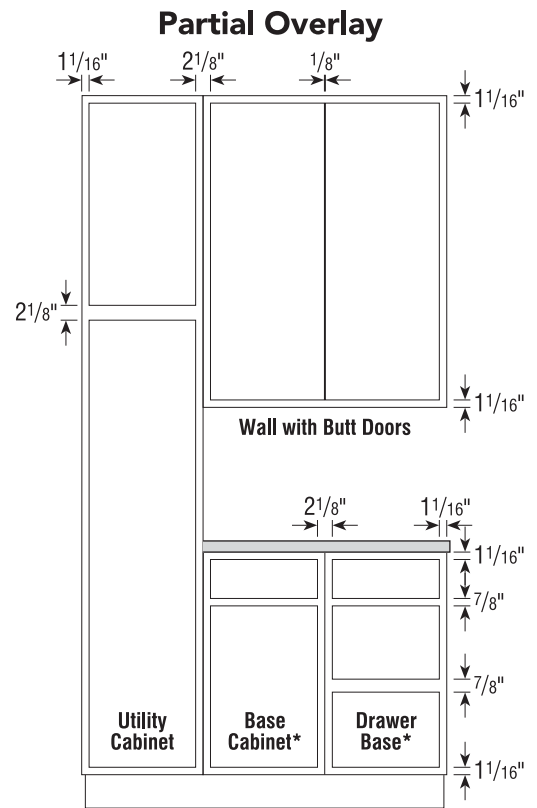

When wood shrinks, miter joints open as shown above.

Steps Consumers Can Take To Protect Real Wood Furnishings

- **Keep an eye on the humidity inside the home.** Reasonably accurate digital thermometers-hygrometer units are available to measure humidity.
- **Maintain the humidity at or above 20% when the temperature is below 20 degrees and over 35% when the temperature is above 20 degrees.** Some ways this may be accomplished are installing a whole-house humidifier on the furnace, running a portable humidifier in key rooms, or placing pans of water near the heat registers.
- **Don't over do it.** Significant condensation on windows is a sign the humidity levels are too high for outside temperature conditions.
- **Recognize that finished wood responds to humidity over a period of several days to several weeks.** It takes time before the wood returns to normal after any correction to the environment.

Full and Partial Overlay Specifications

*35" high application shown
One double door center stile cabinet has the same reveal as two single door cabinets.

Full Overlay
► Full overlay doors reveal 1/4" of the cabinet face frame.

Partial Overlay 7/16"
► Partial overlay doors reveal 1 1/16" of the cabinet face frame.

Common Style Numbers for Finishes

SPECIES	FINISH	COMMON STYLE NUMBER
Oak	Wheat	030
Thermofoil	White**	031
Birch	Autumn	032
Birch	Rouge	034
Birch	Saddle	036
Birch	Sarsaparilla	035
Miscellaneous*	N/A	011

* Use style number 011 for miscellaneous items such as pantry shelf kits, roll out kits, and double wastebasket roll out.

** White common styles will be painted white.

Finish Descriptions

	FINISH NAME	DESCRIPTION
STAIN	Autumn	Mid-tone stain with warm, copper tones
	Rouge	Traditional cinnamon red tones
	Saddle	Medium, warm brown stain
	Sarsaparilla	Rich, deep brown stain
	Wheat	Light stain with golden undertones
THERMOFOIL	White	A pure white color

Finishing Process

Contractor's Choice offers a variety of cabinet construction and finish options in order to allow for maximum design flexibility. Below are details about wood characteristics to assist you in deciding on a wood type and finish.

The Contractor's Choice finishing process starts with top quality lumber that is sanded down to reach difficult areas before the doors are assembled. After assembly, each door is inspected before a toner is applied with a spray. After applying toner to each door, drawer front, and face frame, a layer of stain is added using a spray finish which is then hand rubbed into the wood for maximum penetration and long-lasting beauty. A UV sealer is then applied during the finishing process to fill the grain. Finally, a UV topcoat is applied onto the door, providing a protective layer and beautiful, lasting finish. A final inspection is given at the end of the process to ensure each door is ready for cabinet assembly.

The finish you select for your door style is just as important as the wood type. Each piece of wood will react differently to the finish material used, resulting in a slight variation in shade within and between cabinets. When natural, light, or tinted finishes are applied, the natural grain characteristics are apparent. For easy care and lasting beauty, Contractor's Choice covers interior surfaces of cabinet walls, backs, and shelves with Aristex™ surface, a urethane-coated laminate.

Warped Door Policy

Contractor's Choice cabinetry is constructed to strict specifications, including the moisture content present in wood. When the moisture content is maintained at a constant level, Contractor's Choice is able to minimize the amount of expansion and contraction associated with natural wood. When a great amount of expansion and contraction occur, the result can be a warped door. By strictly controlling the amount of humidity present during manufacturing, Contractor's Choice cabinetry is helping to ensure you receive a quality product.

Because wood is a natural product, each piece of wood exhibits its own unique color and grain variations. These differences give wood its genuine beauty. The wood's natural properties also determine how each individual piece will react to changing weather conditions. Therefore, eliminating warped doors is virtually impossible.

If you feel that you have a warped door, Contractor's Choice requires that you perform initial testing to determine the extent of the problem.

1. Remove the door from the cabinet and remove all decorative surface knobs or pulls and hinges.
2. Place the door on a completely flat surface, as determined by using a level, and alternately press on the opposite corners to observe if the door "rocks" or pulls away from the flat surface.
3. If you observe a gap between the door and flat surface, measure the distance to determine the amount of warpage.
 - A door must be warped at least $\frac{1}{4}$ " before it can be considered for replacement. When ordering a replacement by using Contractor's Choice Part Replacement Order Form, be sure to fill in the reason for proper replacement code as "W".
 - If the door is warped less than $\frac{1}{4}$ ", we recommend you allow a complete heating and cooling cycle (summer to winter) to allow the door to reach moisture equilibrium. Adding magnetic catches or roller catches will often correct minor problems.
4. If the door does not pull away from the flat surface, it is not warped. Most likely, there is a problem with the cabinet installation. When cabinets are not properly installed in a level or plumb position, they will become racked and will cause the door to appear warped. To check for a racked cabinet, place a level on one end rail. The bubble in the level will appear centered. If the cabinet was properly installed in a level position. Now place the level on the other end rail. Again, if the bubble appears centered the cabinet is properly installed in a level position. Any variations in the location of the bubble will indicate the cabinet was not properly installed. (A plumb bob will reveal the same information.)

Another proper installation check is to place the level in the top, and then bottom of the installed cabinets face frame. Identify the bubble's position in both, top and bottom, locations of the face frame. The bubble's position will indicate if the cabinet was not properly installed.

Cabinet Care Suggestions

Cleaning Tip: Never use a dishcloth to clean or dry cabinet exteriors or interiors. Remnants of detergent or grease may be contained within the dishcloth.

Interiors: Contractor's Choice cabinet interiors are surfaced with Aristex®, a quality laminate material that resists scuffs, marks, and most common household spills.

1. To clean the interior surface, simply wipe with a damp cloth or sponge, then dry.
2. To remove food residue or grease, use the suds from any common dishwashing liquid and a damp cloth to wipe clean. Dry thoroughly.

CAUTION: If a spill occurs, it is important to clean up the spill and dry the surface immediately. A spill left unattended will soak through the Aristex® and cause damage.

Exteriors—Wood Finish: Contractor's Choice wood exteriors are manufactured with a quality finish that protects the wood and brings out its full beauty. To maintain your cabinets' appearance, Contractor's Choice recommends cleaning them at least once a month.

1. Simply wipe the surface of your cabinets with a clean damp cloth, then dry.
2. To remove general soil or grease, use the suds from any common dishwashing liquid and a damp cloth to wipe clean. Dry thoroughly.
3. Excess moisture can damage any cabinet finish; areas near the sink, range, dishwasher, oven and baseboards are the most susceptible. Keep these surfaces dry.
4. Because Contractor's Choice uses a quality varnish on the finish, waxing your cabinets is not necessary. If waxing is preferred, use any furniture polish or lemon oil recommended for fine furniture. Be sure to completely wipe off the excess wax to avoid build-up.

CAUTION: Avoid using cleaners that contain bleach, ammonia or state on the label they have any type of abrasives. These cleaners can cause damage to your cabinet finish.

Exteriors—Laminate/Thermofoil: Some Contractor's Choice styles use doors and drawer fronts with a laminate or thermofoil finish. To clean this type of finish, Contractor's Choice recommends the same procedure described for wood exteriors.

Exception: DO NOT wax laminate or thermofoil cabinet surfaces.

Discontinued Product Policy

- A minimum of 60 days notice will be given to customers announcing the discontinuation of a product.
- Product will no longer be available to order after the discontinuation date. Only warranty orders will be considered. With warranty orders, Contractor's Choice will have the option to repair or replace a customer's defective product with the same discontinued product they originally purchased or with a current product that is similar in appearance.

Freight Policy

- If an entire order is no charge, Contractor's Choice will pay for standard ground freight.
- If an order contains a chargeable item, the cost of freight will be charged to the customer's invoice.
- If a customer requests an upgrade to a parcel shipment method, the customer will be charged the entire freight charge.

Returned Goods Policy

- All cabinets are manufactured according to the individual order and cannot be changed, cancelled, or returned once order has been scheduled.
- Installed or freight damaged cabinets may not be returned.

Transportation Claims

- Please inspect merchandise at time of signing freight bill, and have the transportation company note any damage incurred in transit.

Disclosure

- Prices and specifications are subject to change without notice.
- The responsibility of Contractor's Choice ceases upon delivery of product in good order to transport companies and all product is shipped at consignee's risk.

Contractor's Choice One Year Warranty

One year warranty on all Contractor's Choice styles from the original date of purchase.

Should the cabinetry fail during the application warranty period due to defects in material or workmanship under normal use, necessary repair or replacement will be provided for the defective product.

This warranty does not cover products which are misused, abused, mishandled, improperly installed, improperly stored, changed, modified, or subjected to extreme temperatures or extreme moisture levels. This warranty is not valid for products used for any purpose other than the purpose for which they are originally intended. This warranty does not cover the cost of installation, removal, subsequent damage, or transportation of the defective product, regardless of whether the work was performed by a contractor, service company or yourself.

THIS WARRANTY IS THE EXCLUSIVE WARRANTY OF CONTRACTOR'S CHOICE AND IS IN LIEU OF AND CONTRACTOR'S CHOICE DISCLAIMS ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This warranty gives you specific legal rights and you may have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

To obtain replacement(s) under Contractor's Choice One Year Warranty, first contact your authorized Contractor's Choice Cabinetry dealer or distributor, who will arrange for inspection of the cabinet. A dated sales receipt as proof of purchase is required to obtain benefits from this warranty.
